

# Towards a Digital Water Future

# IWA Digital Water Programme

# IWA Digital Water Programme

## Vision

The uptake and integration of digital water will shape resilient water utilities of the future who manage water wisely, sustainably, and equitably.

## Mission

The Digital Water Programme (DWP) provides a platform for water utilities to explore and share their experiences on the digital water journey. The DWP provides roadmaps and guidance that help water utilities make the transition to the next generation of smart water systems and fulfil the need for improved resiliency to secure and sustainably manage water resources now and in the future.

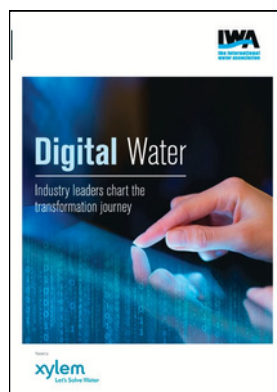

### Digital Water Initiatives

- Digital Water Programme White Paper Series
- Digital Transformation Hub (DTHub)
- Earth Observation for Water Management Community of Practice
- Webinars
- Blogs and articles
- Podcasts

Get involved here: [www.iwa-network.org/our-work/digital-water-programme](http://www.iwa-network.org/our-work/digital-water-programme)

The DWP aims to act as a catalyst for innovation, knowledge, and best practices around digitalisation for the water industry, provide a platform to share experiences and promote leadership in transitioning to digital water solutions, and consolidate lessons to guide the natural evolution from 'business as usual' to achieving a digital water utility.

The DWP is driven by end users (e.g., utilities and regulators) as well as solution providers (e.g. technology companies, software companies, researchers, and academia) at the forefront of emerging technologies to solve urgent and costly operational problems to deliver water services.

## Programme objectives

The overall goal of the programme is to facilitate utilities' access to knowledge that enhances the rate of success of their digital initiatives and prowess. The objectives of the programme ensure this goal can be achieved.

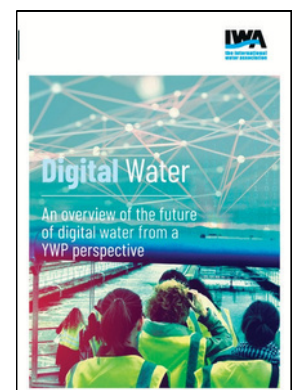

### Objectives

- Collate and disseminate knowledge from members
- Facilitate collaboration across IWA programmes, projects, and initiatives
- Foster peer-to-peer exchange and community building
- Create a focal point in IWA for digital water (through B2B events, Digital Transformation Hub, sharing of case studies)

## Steering Committee

The aim of the Steering Committee is to provide advice, support, guidance, and oversight of the DWP, ensuring the delivery of outputs and the achievement of the defined programme's outcomes. The diversity in geographic location, gender, and backgrounds plays a key role in the success of the programme.

The DWP stretches far and wide throughout IWA communities, namely Specialist Groups, IWA Fellows and Young Water Professionals. The commitment and dedication of the Steering Committee members, along with the support and engagement of the IWA network and Secretariat, have successfully positioned the IWA DWP as the focal point for discourse and knowledge sharing about digitalisation within the water sector.

# Engage with us

## Get involved via our channels:

- Join our **IWA Connect Plus Group**
- Contribute through blogs, videos, podcasts, webinars, or White Papers
- Tell us your digital transformation story
- Join the IWA Earth Observation for Water Management Community of Practice

“Digital Water is the key that will help the global water industry unlock the value that is inherent in the data that the global water industry collects. All of this can be used to bring insight into some of the world’s trickiest water problems.”

Oliver Grievson, Z-Tech Control Systems,  
Chair of the Digital Water Programme Steering Committee
